

Project: Skincare Confidence by Design

Start Milestone

- Due Sunday by 11:59p.m.
- Points 90
- Submitting a file upload
- File Types pdf
- Available until Jun 22 at 5:59a.m.

Project | Skincare Confidence by Design

L'ORÉAL

In this project, you will bring everything you learned about design thinking and UX research and design to life solving real users problem. You will prototype and test a new digital app for L'Oréal's CeraVe skincare line that makes it easier for someone to start a skincare routine with clarity and confidence. You'll take on the role of a UX designer, and help validate a solution that builds confidence through thoughtful, human-centered design.

You'll start by reviewing research insights and brainstorming creative ideas. Then, you'll select one promising solution to prototype and test with users.

You are encouraged to tackle the brainstorming pieces of this project with others, and may also want to consider pairing up for testing purposes. Please read the instructions carefully, and return to the videos as needed!

Submission Document (Make a Copy)  [\(https://docs.google.com/document/](https://docs.google.com/document/)

Once you are finished, save your document as a PDF and upload it here for the Global Accelerator Team's feedback!

Add This to Your Resume!

Applied user-centered design principles to prototype and tested a digital app solution that supports first-time skincare users. Translated research insights into creative ideas, built low-fidelity sketches/wireframes, and gathered feedback through usability testing.

Project: Skincare Confidence by Design Rubric

Criteria	Ratings			Pts
Ideation	20 pts Full Points You listed three distinct ideas for an app designed to address the user needs identified in the research provided.	10 pts Partial Points You listed fewer than three distinct ideas, OR your ideas were described in less than 2 sentences and poorly defined, OR your ideas did not correspond to the research and context provided (e.g. not for a mobile app, not for skincare newcomers, etc).	0 pts No Points You did not list any app ideas, your response was severely lacking or off topic, or AI was used.	20 pts
Wireframe Images Submitted	30 pts Full Points You provided clear images of 2–3 low-fidelity wireframes or sketches of your app idea.	15 pts Partial Points You provided some images of wireframes or sketches of your app idea, but your submission was meaningfully lacking (for example, in clarity or relevance to the task at hand, or only one image).	0 pts No Points No wireframe sketches submitted or AI was used.	30 pts
Idea Mock Up	10 pts Extra Credit Points You submitted a working, viewable link to a clickable prototype of your app.		0 pts No Extra Credit Points You did not submit a working, viewable link to a clickable prototype.	10 pts
Testing Summary	20 pts Full Points You provided a clear summary of what you observed during testing indicating a meaningful testing experience.	10 pts Partial Points You provided some summary of testing but the description was very thin or indicated a lack of a meaningful process (for example: You stated that you had a friend give you feedback, but clearly didn't observe them interacting with your design).	0 pts No Points No summary of what was observed during testing was submitted.	20 pts
Iteration (Question 5.A)	10 pts Full Points You shared a meaningful	5 pts Partial Points You shared some takeaway or	0 pts No Points No attempt at	10 pts
